

VISION & LEARNING

and why they are linked.

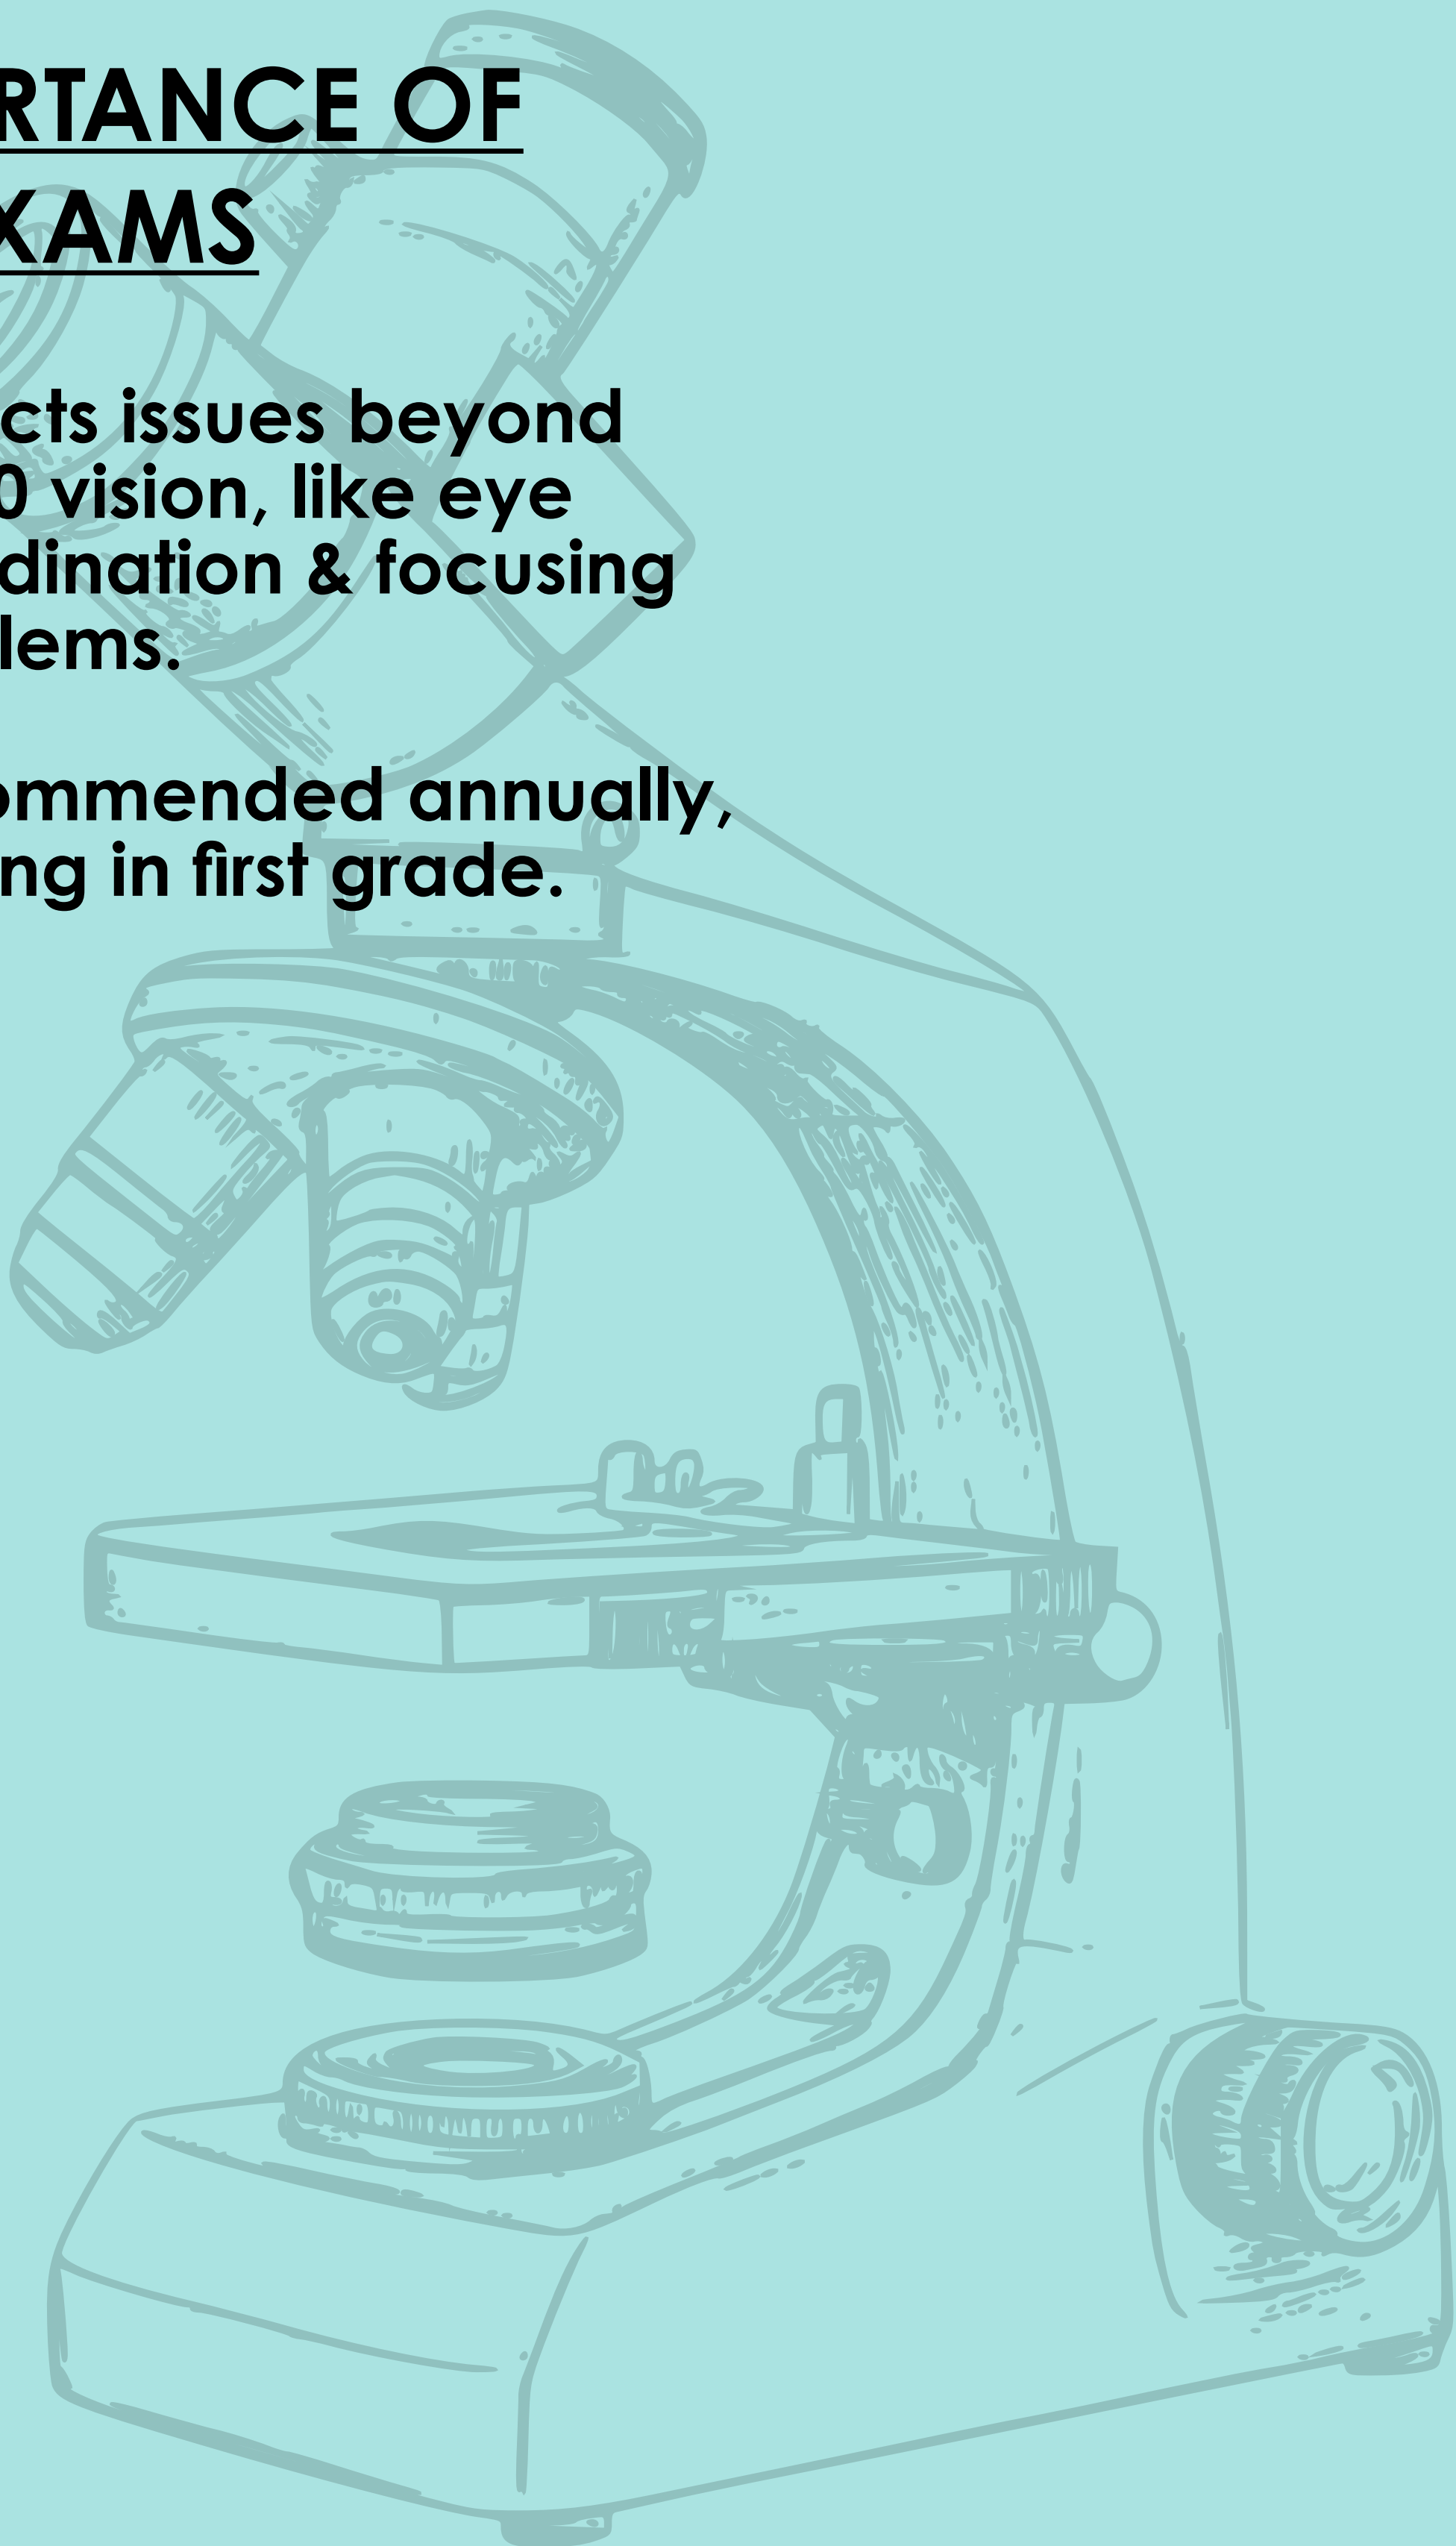

SIGNS OF VISION RELATED LEARNING ISSUES

- **Frequent headaches or eye strain**
- **Avoidance of reading or close work**
- **Covering one eye while reading**
- **Poor reading comprehension**
- **Short attention span during visual tasks**

IMPORTANCE OF EYE EXAMS

- **Detects issues beyond 20/20 vision, like eye coordination & focusing problems.**
- **Recommended annually, starting in first grade.**

VISUAL SKILLS ESSENTIAL FOR LEARNING

- **Eye teaming:**
Coordinating both eyes to work together.
- **Tracking:**
Moving eyes smoothly across a page.
- **Focusing:**
Maintaining clear vision at different distances.
- **Visual processing:**
Interpreting and understanding visual information.

VISION THERAPY

- Customized programs using exercises, lenses, and prisms.
- Aims to improve eye-brain communication & visual efficiency.
- Can lead to better academic success & confidence.

25% of children have
vision problems that
impact learning.
